## PROJECTS

### BuyonClick | E-commerce platform ↗
**React | Redux**
04/2023

- Developed a highly scalable Ecommerce platform using React Js and Redux toolkit.
- Added Speech to Text search bar for in-app browsing of the products.
- Implemented functional cart feature to add, remove or change the quantity of the products.
- Used Redux for centralization, updation and management of the application state.

### NewsViews.com | News Website ↗
**React JS | API**
01/2023

- Developed a website in React Js which provides latest news & information of different categories around the world.
- Integrated open weather api to retrieve current weather information and display it within the web application.
- Designed the app such that it uses reusable nested components to display news articles which enhances the website performance.

### Apocalypse Survivor | Javascript Game ↗
**HTML | CSS | Javascript**
12/2022

- Created an addictive high speed web-based 2D game using vanilla javascript & CSS animations.
- Implemented dynamic features like gravity motion, collision, live scorecard, etc.

### Portfolio Website ↗
**HTML | CSS | Javascript**
10/2022

- Built an interactive website to illustrate my projects & skills with the help of latest web development languages.
- The Website is completely responsive for different screen sizes and multi-media devices.
