PROJECTS

NewsViews.com (Link)   React JS | API
- Used React JS to develop a website which calls an API to fetch current news from different categories around the world.
- Implemented a feature displaying real-time temperature data of a location within the app.

Apocalypse Survivor Game (Link)   Vanilla Javascript
- Created an addictive high speed experience game using vanilla javascript where a character escapes from obstacles to survive.
- The game has dynamic features like Anti gravity & live scorecard.

Personal Portfolio (Link)   HTML | CSS | Javascript
- Built a interactive website for showcasing my projects and other information.
- Website is completely responsive for all types of devices.
